

1. Qwest is the only broadband option available in my area that I'm aware of.
2. I wish to continue to be able to use the ISP of my choice.
3. Should they be allowed to block other ISPs from using their network, I do not believe that Qwest's unregulated DSL pricing would continue to be fair since there is no other DSL provider in my area.

Please do not grant Qwest an exemption from the regulations that allow other independent Internet access providers to use their networks. Thank you!
